# In-House Production Ecosystem Architecture

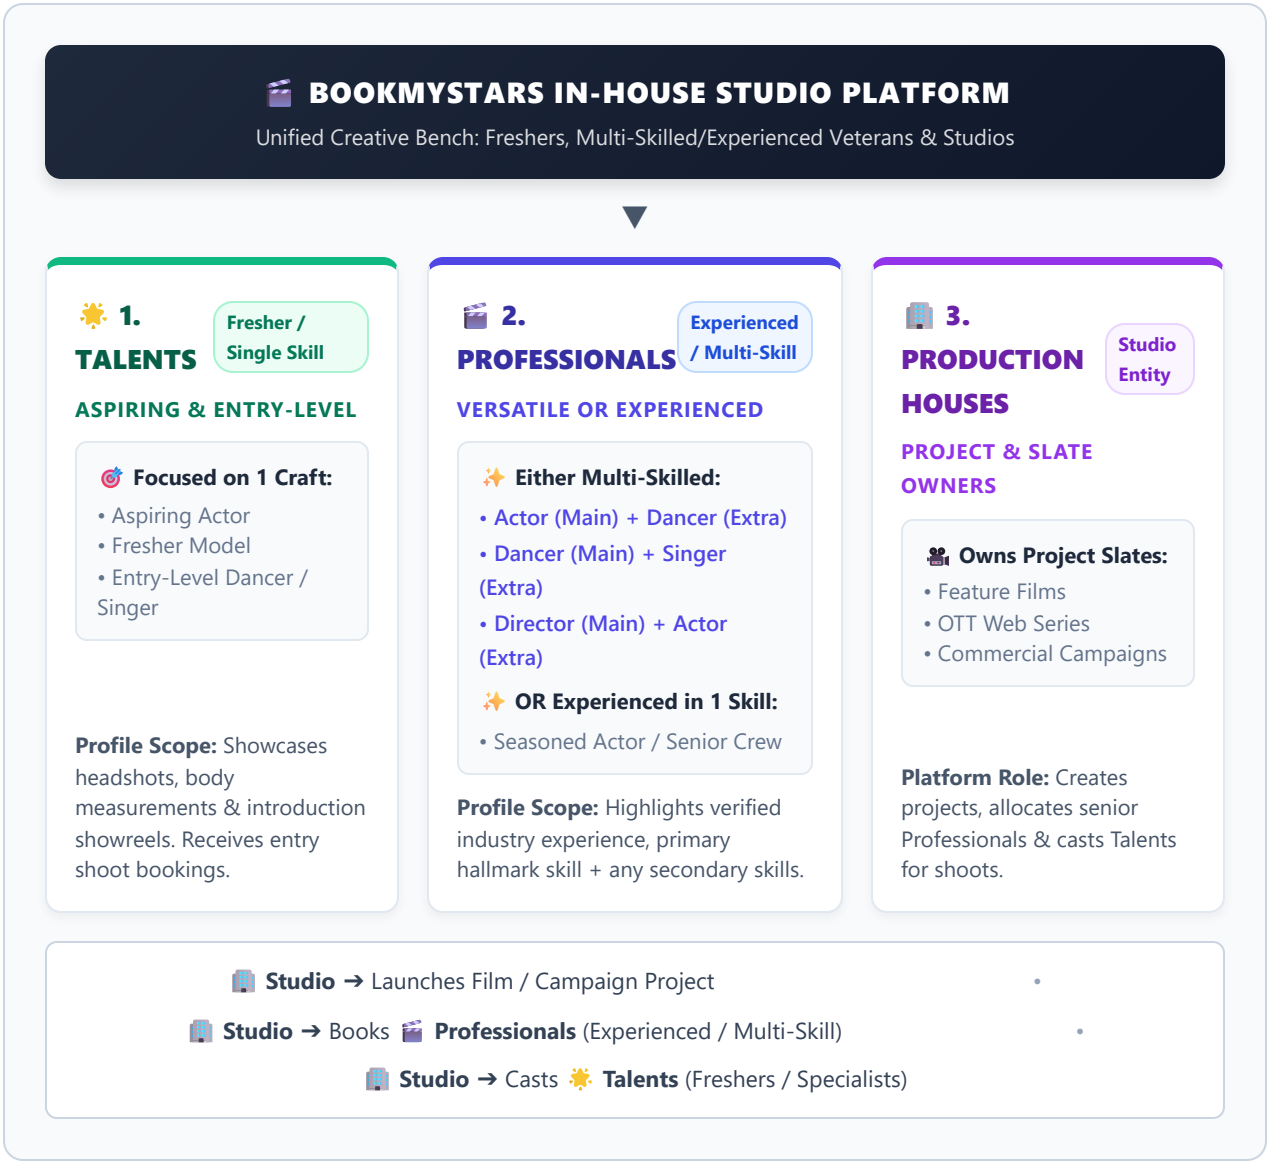

**Core Members:** 🌟 Talent (Fresher/Single Skill) • 🎬 Professional (Experienced or Multi-Skilled) • 🏢 Production House

## 1. Executive Summary

The **BookMyStars** web application is built as an **Integrated In-House Production Operating System**. All three categories are registered internal users of the same studio platform:

- 1. Talent **Entry-level / Fresher / Aspiring Artist** with a single craft (e.g., pure beginner Actor, fresher Model, or entry dancer looking for opportunities).
- 2. Professional **Senior / Experienced Creative** who qualifies either by having **Multi-Skill Versatility** (e.g., Actor + Dancer, Dancer + Singer, Director + Actor) OR by having **proven industry experience in a single skill**.
- 3. Production House **Studio / Banner Entity** that manages film, series, and ad projects, casting and scheduling both Talents and Professionals.

## 2. Visual Architecture: The 3 Pillars Explained

💡 **Clarification on Professional Skills:**

A Professional's primary skill is **not limited to Direction**. The primary skill can be **any craft** (Actor, Dancer, Singer, Director, etc.):

- An **Actor** who also has **Dancing** skills.
- A **Dancer** who also has **Singing** skills.
- A **Singer** who also has **Composing** skills.
- **OR** an artist with **only 1 skill who has proven industry experience / seniority** (e.g. an Actor with 6+ years in the industry is a Professional, whereas a beginner actor is a Talent).
