Manager Aligned Specification • Version 3.0

Platform Product & Architecture Specification

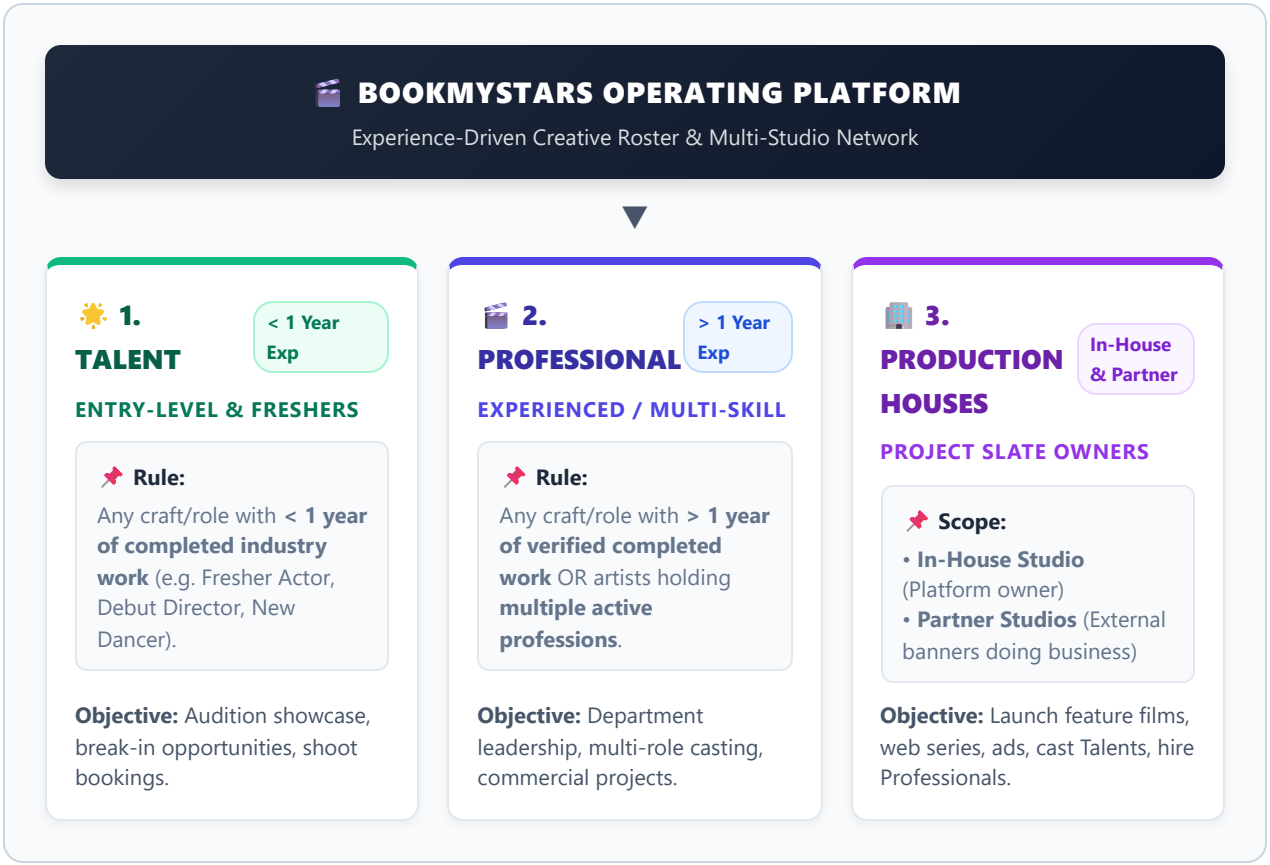

Core Requirements: Experience-Based Classification • Multi-Profession Management • Per-Profession Work CRUD • In-House + Partner Studios

1. Executive Summary & Core Rules

Following the strategic review with leadership, the platform model establishes three fundamental architectural principles:

1. **Experience-Based Segregation:** Anyone (Director, Actor, Dancer, Singer) can register under any role. The distinction between **Talent** and **Professional** is strictly determined by **experience (> 1 year with completed works)**, not their craft.
2. **Dynamic Multi-Profession Portfolios:** Users can dynamically add multiple professions (e.g., initial: *Dancer* → adds *Singer* → adds *Actor*). Navigating to a specific profession provides an isolated workspace displaying only the works and experience for that profession, with full **CRUD** (Create, Read, Update, Delete) capability.
3. **Dual Production House Model:** The platform supports the **Primary In-House Production House** as well as **Partner Production Houses** onboarded to run casting and hire internal roster artists.

2. Visual Architecture: The 3 Core Pillars

3. Task 1 Deep-Dive: Experience-Based Classification

The platform no longer restricts titles to a specific tier. An artist's classification is governed by their **cumulative completed industry tenure**:

Craft / Role	When Considered "Talent" (< 1 Year Exp)	When Considered "Professional" (> 1 Year Exp + Work)
Actor	Fresher actor, acting student, zero or debut indie project	Actor with > 1 year experience, verified films/commercials
Director	Aspiring director, short-film debutant, zero commercial releases	Director with > 1 year experience and completed released work
Dancer	Entry-level dancer, student performer	Lead dancer / choreographer with verified stage/film credits
Singer	Fresher vocalist, cover artist, debut singer	Playback singer / recording artist with official releases
Cinematographer	Assistant camera trainee, debut reel maker	DOP with commercial credits and > 1 year tenure

> ✅ **The Experience Threshold Formula:**
> If `experienceYears >= 1` and user has completed/verified credits, account status is **Professional**. Otherwise, account status remains **Talent**.

4. Task 2 Deep-Dive: Multi-Profession Management & Per-Profession CRUD

Users are not locked into a single title. An artist can maintain multiple creative professions within a single profile:

> 🎭 **Real-World Scenario:**
> **User Registration:** User registers initially as a **Dancer**.
> **Post-Registration Enhancement:**
> - User clicks `[+ Add Profession]` → Adds **Singer**.
> - User clicks `[+ Add Profession]` → Adds **Actor**.
>
> Now the user holds 3 active professions: `[Dancer]`, `[Singer]`, and `[Actor]`.

Dedicated Per-Profession Workspaces with Full CRUD:

- **Navigating to `[Dancer]` Tab:**
  - Displays Dance choreography projects, live stage events, dance videos, and dance training experience.
  - **CRUD:** Add new dance performance, edit show dates/roles, delete obsolete media.
- **Navigating to `[Singer]` Tab:**
  - Displays audio tracks, Spotify/SoundCloud links, studio recording credits, vocal genres.
  - **CRUD:** Upload song clips, update release titles, manage audio portfolio.
- **Navigating to `[Actor]` Tab:**
  - Displays character showreels, dialogue scenes, audition clips, headshots, and theatrical credits.
  - **CRUD:** Add new film credit, update scene link, manage audition material.

5. Task 3 Deep-Dive: In-House & Partner Production Houses

The production pillar operates on a dual-tier model:

- **Primary In-House Studio:**
  - The parent agency/studio owning the web application.
  - Maintains direct governance over internal talents and project assignments.

- **Partner Production Houses (External Banners):**
  - Third-party film production houses, OTT studios, and ad agencies onboarded as official partners.
  - Can publish casting calls, browse the internal roster of Talents and Professionals, and issue official shoot booking contracts.

6. Architectural Blueprint (Entity Design)

```
User (id, fullName, email, accountType: TALENT / PROFESSIONAL)
  └── UserProfession (id, userId, professionName, experienceYears, isPrimary)
      └── ProfessionWork (id, professionId, projectTitle, roleName, mediaUrl, year,
description) [FULL CRUD]

ProductionHouse (id, companyName, isPartner, bannerLogo, activeProjectCount, contactEmail)
```

7. Summary & Approval Confirmation

Please review and confirm these requirements:

- [x] **Talent vs. Professional:** Segregated by **> 1 year experience + completed work** across all roles.
- [x] **Multi-Profession Profiles:** Artists can add multiple roles (Dancer, Singer, Actor) post-registration.
- [x] **Per-Profession CRUD:** Isolated portfolio and work management for each profession tab.
- [x] **Production Houses:** Supports both internal studio operations and verified external partner banners.
