Manager Aligned Specification • Version 3.1

Platform Product & Architecture Specification

Core Requirements: Experience-Based Classification • Registered Profession + Dynamic Skills Management • In-House + Partner Studios

1. Executive Summary & Core Rules

Following the latest alignment with leadership, the platform architecture establishes three foundational rules:

1. **Experience-Based Segregation (Task 1):** Anyone (Actor, Director, Dancer, Singer) can register under any role. The distinction between **Talent** and **Professional** is strictly determined by **experience (> 1 year with completed industry work)**, not their craft title.
2. **Registered Profession + Dynamic Skills Management (Task 2):** A user chooses their primary **Profession** during registration. Once logged in, their profile displays their profession with an interactive **`[+ Add Skill]` button right next to it**, allowing them to add skills (e.g. Comedy, Dancing, Singing) and manage experience/portfolio items.
3. **In-House & Partner Production Houses (Task 3):** The platform powers the primary **In-House Production House**, while also allowing external **Partner Production Houses** to onboard and conduct casting and booking business.

2. Visual Architecture: The 3 Core Pillars

3. Task 1: Experience-Based Classification

An artist's classification is governed strictly by their **cumulative completed industry tenure**:

Profession	When Considered "Talent" (< 1 Year Exp)	When Considered "Professional" (> 1 Year Exp + Completed Work)
Actor	Fresher actor, student, zero or debut indie project	Actor with > 1 year experience, verified films/commercials
Director	Aspiring director, short-film debutant, zero commercial releases	Director with > 1 year experience and completed released work
Dancer	Entry-level dancer, student performer	Lead dancer / choreographer with verified stage/film credits
Singer	Fresher vocalist, cover artist, debut singer	Playback singer / recording artist with official releases

4. Task 2: Registered Profession + Dynamic Skills Addition

Rather than creating multiple disconnected professions, each user has a clear registered **Profession** and can dynamically enrich their profile by adding **Extra Skills** post-login:

> 🎭 **Real-World Scenarios:**
>
> 1. **Scenario 1 (Bharath):**
>   - **Registered Profession:** `Actor` (selected at registration).
>   - **Post-Login:** Bharath logs in, sees his profession `Actor` with an **`[+ Add Skill]`** button right next to it.
>   - **Extra Skills Added:** Clicks the button to add **Comedy**, **Dancing**, and **Singing**!
> 2. **Scenario 2 (Upendra):**
>   - **Registered Profession:** `Director` (selected at registration).
>   - **Post-Login:** Upendra logs in, sees his profession `Director` with an **`[+ Add Skill]`** button next to it.
>   - **Extra Skills Added:** Adds **Acting**, **Screenplay Writing**, and **Lyricist**!

Specialized Skills:

🎭 Comedy 🕺 Dancing 🎤 Singing

Skill-Specific Works & Portfolio CRUD:

- Under each skill or profession, users can showcase dedicated projects, media reels, and experience.
- Full **CRUD** operations:
  - **Create:** Add a new project or work experience (e.g. Add Comedy Show, Dance Performance, or Film Role).
  - **Read:** View all projects and media belonging to that craft.
  - **Update:** Edit project titles, roles, shoot dates, and media links.
  - **Delete:** Remove obsolete works or remove added skills.

5. Task 3: In-House & Partner Production Houses

- **In-House Studio:** The internal production entity that owns the platform and manages the internal bench of Talents and Professionals.

- **Partner Production Houses:** External third-party production banners and agencies onboarded as official partners to publish casting calls and hire roster members.

6. Leadership Confirmation Checklist

- ☑ **Task 1:** Role status is strictly experience-driven (> 1 year experience = Professional; < 1 year = Talent).
- ☑ **Task 2:** Profession is chosen at registration, and extra skills (Comedy, Dancing, Singing) can be added post-login using an **`[+ Add Skill]` button next to the profession**.
- ☑ **Task 3:** Platform supports both the primary In-House studio and external Partner Production Houses.
